We took that feedback and data, looked at the refinement system, and made changes we are excited to share with you. Instead, players now have an enhancement page on their character sheet. To help with this and to let people play as they normally would when the update goes live, characters will get temporary enchantments equipped automatically. Á Á These enchantment have the item level of rank 4 in the new system and give a range of balanced stats. These motes increase the chance by 1%, 2%, 5%, 10%. The lowest tier can be bought in the refinement sage shop in PE. If you are at max refinement points of 50,000,000 then you will need to spend some of that ahead of the update to receive the refunds. A rank 2 enchantment in the new system is 600 Item Level which is why it takes 3 rank 15s to convert into a rank 2. No More Unslot Cost In the new refinement system there is no more unslot cost for enchantments. Exchanging existing armor and weapon enchantments will also give you one of these matching effect items so you both have the visuals you had access to before and have new flexibility in how your character looks. All of the refinement points are needed upfront and it goes directly into a chance to upgrade. After 5 stacks, the stacks are used up and the player is healed for 1.5%-7.5% of their maximum hitpoints. We have combined all of this into a single UI that is universal to all items.
